

Patent  
267/242

continuation of U.S. Application Serial No. 08/703,601, filed on August 23, 1996, now U.S. Patent No. 5,849,849, which in turn is a continuation of U.S. Application Serial No. 08/232,233, filed on May 5, 1994, now U.S. Patent No. 5,565,322, which was filed under 35 U.S.C. §371 based on International Application PCT/US92/09827, filed November 6, 1992, which in turn is a continuation-in-part of U.S. Application Serial No. 07/790,262, filed November 7, 1991, now abandoned. Each of the above-identified patents and applications is expressly incorporated herein by reference.--

**REMARKS**

Applicant notes that the statement of priority as originally filed inadvertently omitted reference to the great-grandparent application, Serial No. 08/703,601, filed on August 23, 1996, now U.S. Patent No. 5,849,489. The statement of priority is correctly stated in the grandparent application, Serial No. 09/123,638, filed on July 28, 1998, now U.S. Patent No. 6,162,638 and has been corrected in the parent application Serial No. 09/724,753, filed on November 28, 2000. In addition, applicant notes that the Declaration of inventor Michael Heller, which accompanied the present application on its filing date of November 29, 2001, refers to U.S. Application Serial No. 08/703,601.

Favorable consideration and entry of the above amendments is respectfully requested. The Commissioner is hereby authorized to charge any fees that may be required to Deposit Account No. 12-2475.

Respectfully submitted,

LYON & LYON LLP
